

Enjoy freedom to roam  
with the Interstate

# 'Volt' Pack

## Why upgrade to the 'Volt' Pack?

- **Swap gas for batteries**  
No more gas bottle refills.
- **One energy source**  
AC and microwave run on your 400-amp battery bank and 3000-watt inverter system.
- **Free power from solar**  
Enjoy 240V power directly to the AC and power points.
- **Instant induction cooking**  
Faster, easier, and cleaner compared to gas.
- **Hot water & room heater**  
Enjoy hot water and heating direct from the vehicle's diesel tank.
- **No fumes or condensation**  
Cleaner air and a drier interior.
- **Low maintenance**  
Does not require gas checks, regulators, or compliance tests.
- **Better off-grid performance**  
Solar, lithium batteries and 75 Amp DC-DC charger can practically sustain daily use.
- **More efficient systems**  
Inverter and lithium deliver stable, reliable power.
- **Smart energy management**  
Monitor and control power usage digitally with REDARC.
- **Eco-friendly**  
Zero LPG emissions.
- **Cheaper long-term camping**  
Self-sufficient, reducing costs due to gas refills, replacement bottles or campsite fees.
- **Modern comfort**  
Consistent heat, cooling, and cooking at the touch of a button.
- **Simple compliance**  
Removes gas plumbing under or inside the vehicle, making nationwide registration even easier.

# Introducing the Interstate One 'Volt' Pack

The ultimate all electric  
off-grid upgrade

## Specifications

---

400Amp Lithium batteries

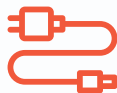

500 Watts of solar charging

Diesel hotwater system and room heater

3000w Redarc Inverter

75 Amp DC-DC charger

Redarc Redvision System

Webasto soft start air-conditioning

Induction cooker

Anderson plugs for input and output

Price for upgrade:

**\$16,990** Inc GST
